

How The Points Work

To help you understand how the point system and average works:

1st through 10th fastest times and highest scores get points from 10 to 1. Once a contestant has earned go round points, the points they carried in from the district level are activated in that event only.

The total of a contestant's 1st go round and 2nd go round times or scores qualify them for the top 20. But please remember that it is a contestants points that qualify them for nationals.

Example:

1st Go - 10 points

2nd Go - 10 points

Top 20 - 10 points

Average points - 15

Total points in each Go is 55.

Carried in points from district if activated are added.

Points:

Go Round points 10 to 1

Average points 15 to 1.5 (in .5 increments)
